

The purpose of the **League of Optimists of the Kingdom of Belgium** is to help bring about a change in the mentality of the inhabitants of Belgium, encouraging optimism and enthusiasm, good humour and positive thinking, greater daring and a spirit of enterprise, tolerance and understanding between individual citizens and linguistic communities.

The association also seeks to make people more aware of the fact that to live in Belgium is a considerable privilege and also to favour open-mindedness towards Europe and the World.

Anybody, whatever their background, nationality, place of residence, religious and philosophical convictions, race, language, disability or past, can be a member, as long as they adhere to the spirit of the association.

Convinced that thought creates reality, members shall struggle against resignation, moroseness and negative thinking, preferring good to bad news.

Members would very much appreciate people speaking well of them, when it is all too easy to speak ill of others.

The association is not a political forum and abstains from any debate of that nature.
